The VCC Learning Centre supports students in becoming strong, independent learners. This referral form can assist both student and tutor in using their session time effectively.

Student:

Bring your copy of this form with any notes, assignment instructions, and/or marked papers or tests related to the areas listed below.

Student / Instructor information

Student last name (family name) | Student first name | Date

Instructor name | Instructor local | Instructor email

Instructor to complete

Instructor, please speak with your student to identify and agree on areas where support is needed. In the space provided, be as specific as possible about the learning objectives and/or skills to review.

For example, instead of "math," write "apply trigonometric identities and calculate angles from inverse trig functions." Or, instead of "writing help," put "review how to identify and correct fragments and run-on sentences." Please give your student a copy of the completed referral form.

Areas of study needing support:
